Slide Executive Desktop

Slide Executive Desktop converts your PowerPoint® presentation files into a searchable knowledgebase of digital assets.

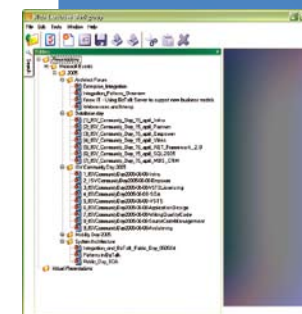

The Desktop Edition is suited for the single user as well as workgroups of two to ten users. This edition enables the users to manage the media files on their personal computer or on shared drives with other users. The product serves as a repository and a tool to easily create new presentations.

Working in a workgroup

By placing shared presentations on a network share, users can index and thus search each others presentations. As other users update their presentations on the share, the other users will benefit from this as Slide Executive will automatically notice this change.

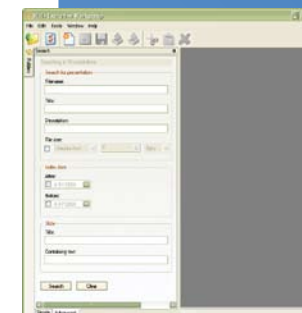

Organized repository

The Desktop edition will keep your presentations organized and easily accessible. Slide Executive scans the folders you select for existing presentations and indexes them. The library is kept up to date by checking which files have been added, changed or deleted.

Search functionality

The search feature is a fast and powerful way of finding presentations or slides that can then be used in a new or existing presentation.

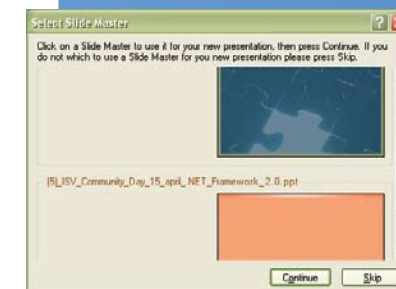

Drag and drop slide into place

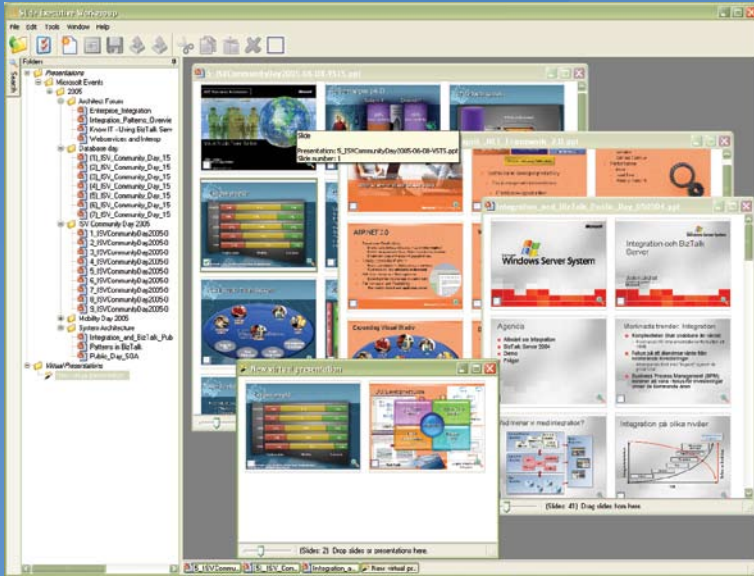

Slides can easily be dragged from existing presentations or from search results onto new virtual presentation. The virtual presentation can then be exported to a Microsoft PowerPoint presentation.

Create presentations on the fly

Once a virtual presentation is created from existing slides it can be saved to a new Microsoft PowerPoint presentation in a matter of seconds. Choose whether to use an existing template, use one from which the slides come from or choose to keep each slides individual design.

Five reasons to choose Slide Executive Desktop

1. Exceptional Value

Slide Executive Desktop helps you get an outstanding return on investment by providing you with a tool to organize and search your presentation. In less than an hour of saved time you will have recuperated your investment.

2. Ease of Use

Intuitive and easy to use, our software is developed to be simple yet powerful. User-friendly with a format and style that follows your.

3. Increased Productivity

Slide Executive Desktop helps you use your time more productively through fewer repetitions. By keeping you organized and helping you find the slides you need quicker, the Desktop version will keep you ahead of the competition.

4. Enhanced Efficiency

With Slide Executive Desktop, you'll be able to produce presentations faster, concentrating on a few specific slides that need to be created – all contributing to your company's revenue. Focus on creation, not on searching for existing slides.

5. Quality

Don't create the same slide over and over again, just because you can't find it. Maintain precise control of your brand and content, ensure that the same accurate information is distributed and presented to your clients.

1. Index your presentations

2. Search your library

3. Select existing slides

4. Save the presentation

5. Your new presentation is ready
